

SCA Summer Reading Activities and Suggestions for Students Entering First Grade

These books and activities are suggested for summer reading. The purpose of summer reading is to encourage a love for reading by having children sit down with a good book and an even better audience...his/her parents!

As with any book your child reads, parental preview and monitoring of the material is always wise. Students entering first grade are encouraged to read one book from the attached list and one book of their choice and then complete the form below. You may help your child complete the form below, or you can cheer him/her on from the sidelines! Either way is fine as the end result is the goal.

After reading your books, choose one that is about make-believe people or animals. Make believe stories are those that we know aren't real because they contain things that can't really happen (like talking animals or giant people); make believe stories are called *fiction*.

Complete the attached form and bring it with you when you come back to school in August! We'll kick off our school year with fiction books...I can't wait to hear which books you read! If you'd like some book suggestions, you can look at the list on the back of this note. There are many others to choose from, but this might give you some new ideas.

Have a great summer and enjoy some time relaxing with a good book. You never know where it might take you!
